Rhode Island Department of Education Data Collection Specifications – Enrollment

Last Updated on August 27, 2021

About

Enrollment data includes information regarding student enrollment in a school including the district of residence, the start and end date of the enrollment period, the reason for ending the enrollment. Enrollment data is used frequently including federal reporting, funding formula calculations, student average daily membership (ADM), state assessment rosters and accountability.

Requirements

The *Enrollment* data submission is an existing submission that LEAs have been submitting to RIDE. *Enrollment* must be submitted daily to RIDE. There are specific dates throughout the year in which enrollment data is pulled for reporting. Prior to these reporting dates, districts must correct all errors within their submission and also resolve all duplicate student records.

Changes for the 2021-22 School Year

When reporting students with the enrollment_type of G or N that are assigned to your '190' school code you must report the home school in the SCHCODE_HOME field for these students – this is the school in your district that the student would attend if the student was not attending a GED or Transition program.

Submission Process

Enrollment data can be submitted through eRIDE (www.eride.ri.gov) using the Enrollment Census application or through the Automated Data Transfer (ADT) agent. *Enrollment* is a submission type within the Enrollment Census application.
