# Enrollment Census Data Validation Rules

**School Year** 

2011-12

v002; Last revised on: January 18, 2012

The Office of Network and Information Systems at the Rhode Island Department of Education is responsible for collecting enrollment census data from the Local Education Agencies in Rhode Island. This document is a reference that lists the various data elements and validation rules for each collection.

| bout                              | 4  |

## **About**

There are currently ten different types of files that eRIDE can process through the Enrollment Census; each having their own set of validation rules:

1. Address and Residential Community

2. Attendance

3. Discipline

4. Enrollment

5. Program Core

6. Summer Withdrawal

7. TCS: Course

8. TCS: Section

9. TCS: Staff

10. TCS: Student

In addition, the application can impose different sets of validation depending on school year. The validation rules are predominantly database-driven and can be turned on or off at runtime without recompiling the application. The only rules that are not database driven are a set of validation rules called "complex validation" which will be mentioned later on in this document.

All files go through four sets of validations:

- 1. Surface Level
- 2. Simple
- 3. Dictionary
- 4. Complex

## **Validations**

#### **Surface Level Validation**

All files/datasets undergo surface level checks, ensuring that the correct column names for the data collection have been provided in the file. The order of the columns in the file does not matter to the application. As long as the column exists, the system will accept it – providing the user flexibility of adding additional reference columns that will be ignored by the system during processing. The application allows some columns to be "optionally" provided – the surface level process considers this. In addition, our application allows a user to submit several different file types (for example, a discipline submission and enrollment submission) in one file using the multi-sheet feature in Excel workbooks. The surface level check will make sure that the Excel file submitted has the correct worksheets to perform a multi submission-type file. The entire contents of the file are read to affirm "readability," but no data is examined at this point. If the file successfully passes this stage, a row count is determined and the file is uploaded to our servers for more in-depth validation checking. If the file fails here, the file is never stored on our servers and is rejected peremptorily.

#### **Simple Validation**

This validation stage looks row-by-row, column-by-column, and field-by-field into the file and ensures that files adhere to certain data rules. These rules are defined in a table that can be easily modified by the application manager. The following rules are enforced in the simple validation check:

- 1. **Type**: Data type of field; can be text or date.
- 2. **Length**: The maximum length of the field. For instance, district code has a length of two, meaning an error will be displayed if the supplied data exceeds this.
- 3. **AutoFill**: True or false. Our enrollment collection allows some data element values to be automatically filled by the application. For instance, if the district chooses not to supply the IEP data, the application can automatically populate this field from the Special Education Census.
- 4. Blank Allowed: True or false. Determines if a NULL or empty value in this field can be supplied.
- 5. **Force Length:** True or false. If set to true, an error will be thrown if a field has less characters than the value of "Length." For example, this is set for "True" for school code, because we know that any school code supplied that is less than five characters would be incorrect.

# **Address and Residential Community**

| Name            | Туре | Length | Blank Allowed | Optional | Force Length | Dictionary |
|-----------------|------|--------|---------------|----------|--------------|------------|
| ADDRESS_D_CITY  | TEXT | 50     | Yes           | Yes      | No           | n/a        |
| ADDRESS_D_L1    | TEXT | 50     | Yes           | Yes      | No           | n/a        |
| ADDRESS_D_L2    | TEXT | 50     | Yes           | Yes      | No           | n/a        |
| ADDRESS_D_STATE | TEXT | 2      | Yes           | Yes      | No           | n/a        |
| ADDRESS_D_ZIP   | TEXT | 5      | Yes           | Yes      | No           | zipcode    |
| ADDRESS_D_ZIP4  | TEXT | 4      | Yes           | Yes      | No           | n/a        |
| ADDRESS_M_CITY  | TEXT | 50     | No            | No       | No           | n/a        |
| ADDRESS_M_L1    | TEXT | 50     | No            | No       | No           | n/a        |
| ADDRESS_M_L2    | TEXT | 50     | Yes           | Yes      | No           | n/a        |
| ADDRESS_M_STATE | TEXT | 2      | No            | No       | No           | n/a        |
| ADDRESS_M_ZIP   | TEXT | 5      | No            | No       | No           | zipcode    |
| ADDRESS_M_ZIP4  | TEXT | 4      | Yes           | Yes      | No           | n/a        |
| DISTCODE        | TEXT | 2      | No            | No       | Yes          | leas       |
| EMAIL_ST        | TEXT | 60     | Yes           | Yes      | No           | n/a        |
| LASID           | TEXT | 20     | Yes           | Yes      | No           | n/a        |
| LASTNAME        | TEXT | 50     | No            | No       | No           | n/a        |
| PHONE_EMG       | TEXT | 15     | Yes           | Yes      | No           | n/a        |
| PHONE_PC        | TEXT | 15     | Yes           | Yes      | No           | n/a        |
| PHONE_SC        | TEXT | 15     | Yes           | Yes      | No           | n/a        |
| PHONE_ST        | TEXT | 15     | Yes           | Yes      | No           | n/a        |
| SASID           | TEXT | 10     | No            | No       | Yes          | n/a        |

#### Attendance

| Name        | Туре | Length | Blank Allowed | Optional | Force Length | Dictionary  |
|-------------|------|--------|---------------|----------|--------------|-------------|
| ATTEND_DATE | DATE | 10     | No            | No       | No           | n/a         |
| ATTEND_TYPE | TEXT | 2      | No            | No       | Yes          | attend_type |
| DISTCODE    | TEXT | 2      | No            | No       | Yes          | leas        |
| LASID       | TEXT | 16     | No            | No       | No           | n/a         |
| SASID       | TEXT | 10     | No            | No       | Yes          | n/a         |
| SCHCODE     | TEXT | 5      | No            | No       | Yes          | n/a         |

# Discipline

| Name            | Туре | Length | Blank Allowed | Optional | Force Length | Dictionary     |
|-----------------|------|--------|---------------|----------|--------------|----------------|
| DISCIPLINE      | TEXT | 1      | No            | No       | Yes          | discipline     |
| DISTCODE        | TEXT | 2      | No            | No       | Yes          | leas           |
| DURATION        | TEXT | 3      | No            | No       | No           | n/a            |
| INFRACTION      | TEXT | 2      | No            | No       | Yes          | infraction     |
| INFRACTION_DATE | DATE | 10     | No            | No       | No           | n/a            |
| INJURY          | TEXT | 1      | No            | No       | Yes          | physicalInjury |
| LASID           | TEXT | 16     | No            | No       | No           | n/a            |
| LASTNAME        | TEXT | 50     | No            | No       | No           | n/a            |
| REASON          | TEXT | 250    | Yes           | No       | No           | n/a            |
| SASID           | TEXT | 10     | No            | No       | Yes          | n/a            |
| SCHCODE         | TEXT | 5      | No            | No       | Yes          | n/a            |

## **Dictionary Validation**

Many fields have a predefined list of possible values. For instance, there are only three possible values for lunch status (F, N, or R). In the same table that lists all the fields for the collection (tbl\_enroll\_census\_fieldDefinition), there is a field called "Dictionary." The value there is a pointer to the dictionary (tbl\_itemValues) used to validate the data in this field. Fields marked as dictionary are checked against another table that lists all the possible values, and will throw an error if the value does not exist in the dictionary. Most of the fields will have a dictionary associated with it. Some examples from the enrollment collection include the home language field, exit type field, et al. An interactive data dictionary can be found here: https://www.eride.ri.gov/eRide40/DataDictionary/Default.aspx.

| W    | Withdrew       |

#### **Complex Validation**

The final validation process a file will enter in is called Complex Validation. In this process, fields will be scrutinized even further in ensure data quality. For instance, in our attendance collection, we have a validation check that checks a student's absence date against the district's calendar. If the district had flagged a day to be a holiday or a snow day for instance, and an attendance record is suggesting that a student is absent on that date, an error flag will be presented. Every submission type (discipline, enrollment, addresses, etc) has different sets of complex validations that are performed against it. Complex validation routines are like add-ons for application. More validation rules can be applied to a collection fairly easily, however, the logic needs to be programmed in.

## **Address and Residential Community**

- District code to user check Authenticates that the eRIDE userid that is submitting the file belongs to the district that the user is submitting for.
  - SASID to last name check Validates that the last name in the SASID master matches the last name provided in the file upload.
- Student enrolled check Verifies that the student is currently enrolled.
- Zip code to city check Checks the zip code and city provided against the dictionary values.

#### **Attendance**

- Attend date check The attendance date that you have provided needs to fall within the district's calendar. The
  attendance date must also be a valid school day; for example, it cannot be during school vacation, a snow day, or during the
  weekend.
- SASID check –Verifies that the SASID provided exists in the SASID master table.
- School code to district code check The school code cannot be blank; must exist in our school table; and must match the
  correct district.
- Student enrolled check Student must be enrolled in the current census.
- User check Checks to make sure that you are a member of the district you are uploading data for.

#### **Discipline**

- Discipline duration check Verifies that the duration field is a whole number.
- Infraction check Makes sure that the reason field is filled out when infraction is set to other.
- SASID to last name check Validates that the last name in the SASID master matches the last name provided in the file upload.
- School code to district code check The school code cannot be blank; must exist in our school table; and must match the
  correct district.
- Student enrolled check Student must be enrolled in the current census.
- User check Checks to make sure that you are a member of the district you are uploading data for.

#### **Enrollment Collection**

- ADA/ADM check Makes sure ADA and ADM fields are not blank when exit date is specified.
- District code to user check This checks to ensure that the eRIDE userid that is submitting the file belongs to the district they are submitting for.
- Enroll/exit date check The exit and enrollment dates are validated. Enroll\_date cannot be greater than exit\_date. The system knows the possible min/max enroll and exit dates and will make sure it falls between these ranges. The ranges are set in a database lookup table.
- Enrollment type check This multi part check enforces the following rules:
  - 1. If enrollment is R (or Regular)
    - a. Makes sure school code is not \*\*190 (or enrolled in administration school code)
    - b. Checks IEP field to ensure the status is not 'S' if regular enrollment
  - 2. If enrollment is O (or Outplaced)
    - a. School code must be \*\*190
    - b. Makes sure school\_code\_out field is supplied
    - c. Checks IEP field to make sure it is not 'S'
  - 3. If enrollment is H (or Homeschooled)
    - a. School code must be \*\*190
    - b. Makes sure schcode\_out field is supplied
    - c. Makes sure schode out is \*\*900 (where \* is district code)
  - 4. If enrollment is S (or Service Plan/ Private Enrolled)
    - a. School code must be \*\*190
    - b. Makes sure schcode\_out is \*\*990 (where \* is district code)
    - c. IEP must be 'S' or 'Y'
  - 5. If enrollment is T (or temporary enrollment)
    - a. School code must be '07702' or DCYF
- Exit type check This check makes sure that exit type field is supplied if an exit date is supplied by user.
- SASID check verifies that the SASID provided exists in the SASID master table.
- School code check this is a multi part check which does the following on the "schcode" field:
  - 1. Checks if school code is valid (the school must be open, and public).
  - 2. Checks if the school code is "owned" by the district that is submitting the data. For example, enrollment records for a Barrington school cannot be submitted by Providence.
  - 3. Checks the school grade The field "grade" is checked to make sure it falls between the range of a school's low and high grade.
  - 4. School code next check The student's current grade is incremented by one (an assumption that a student will matriculate by one grade next year) and is checked to make sure the school in the "schcode\_next" field has this grade. This is a soft error. If it fails this check, it will still allow the data to be inserted but the user will be warned that there may be a possible error.

#### **Program Core**

- Program dates check Verifies that the start date is less than the end date and that the end date is greater than the start date
- SASID to last name check Validates that the last name in the SASID master matches the last name provided in the file upload.
- School code to district code check The school code cannot be blank; must exist in our school table; and must match the correct district.
- Student enrolled check Student must be enrolled in the current census.
- User check Checks to make sure that you are a member of the district you are uploading data for.

#### **Summer Withdrawals**

- SASID to last name check Validates that the last name in the SASID master matches the last name provided in the file
  upload.
- School code to district code check The school code cannot be blank; must exist in our school table; and must match the correct district.
- Summer withdrawal enroll check This checks to make sure that the student was enrolled in the district last year.
- Summer withdrawal exit type check This is a multi part check which: checks to see if the student is enrolled in the district; and checks to see if the student is enrolled in another district during this school year.
- User check Checks to make sure that you are a member of the district you are uploading data for.

#### **TCS: Course**

- User check Checks to make sure that you are a member of the district you are uploading data for.
- LOCALCOURSEID Must be unique for each distcode/schcode combination.

#### **TCS: Section**

- User check Checks to make sure that you are a member of the district you are uploading data for.
- LOCALCOURSEID Must exist in the Course file for each distcode/schcode combination.
- LOCALSECTIONID Must be unique for each distcode/schcode combination.

#### TCS: Staff

- User check Checks to make sure that you are a member of the district you are uploading data for.
- LOCALSECTIONID Must exist in the Section file for each distcode/schcode combination.
- STAFFFIRSTNAME Validates that the teacher's first name in the file matches the certification database.
- SECTIONENTRYDATE Must be equal to or greater than the start of school.
- SECTIONEXITDATE Must be blank or a valid date between the start and end of school.
- ELACONTRIBUTOR Must be Y when the SCEDCOURSE begins with 01 or 51.
- MATHCONTRIBUTOR Must be Y when the SCEDCOURSE begins with 02 or 52.

#### **TCS: Student**

- User check Checks to make sure that you are a member of the district you are uploading data for.
- LOCALSECTIONID Must exist in the Section file for each distcode/schcode combination.
- SASID Verified against the master student list.
- STUDENTLASTNAME Must match the last name in the student's master record.
- SECTIONENTRYDATE Must be equal to or greater than the start of school.
- SECTIONEXITDATE Must be blank or a valid date between the start and end of school.

## **Errors and Warnings**

#### **Error Threshold**

If a file has more errors that the preset error threshold (currently set to 2000), validation is aborted, the file is rejected and the 2000 errors that were found are shown to the user.

## **Hard/Soft Errors**

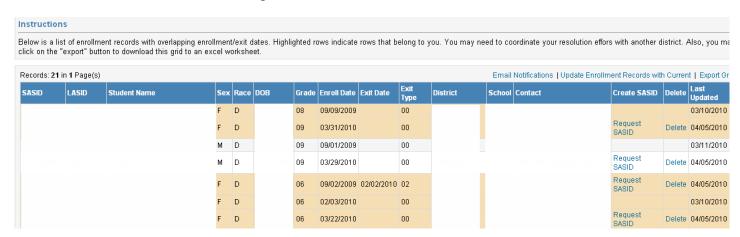

Some errors are considered "soft" errors, or in other words, warnings. When warnings occur, the data is submitted and a list of errors and warnings will be presented to the user. An example would be if the school in the schoole\_next field does not have the "grade" that the student is presumably matriculating into. This will show up as warning to the user, and the data will still be submitted, since some level of grade skipping is legitimate. Hard errors during a manual upload will cause all records rejected. If using the ADT, there is a 5% threshold for hard errors so all records except for the errant ones will be submitted.

#### **Post Validation Flags**

Once a file is submitted and passes all of the validation above, there may still be other things wrong with the data that the application will flag for the user. These two are the Duplicate Check and the Demographic Check.

## **Check Duplicates**

Once a file is submitted, the user can view all the duplicates (or overlapping enrollments) that have been generated by their submission. The screen looks like the following, actual student information has been redacted:

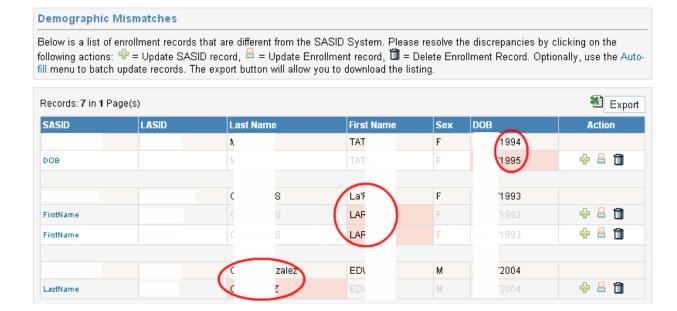

Duplicate records are paired together along with the contact info of the offending district. Functions are available on this page to make it easy for districts to resolve these issues. There is a direct link to the SASID application in the event that the duplicate record should be a new student (with a new SASID). A user can delete the record right from this page. Alternatively, a user can click on the SASID to get an enrollment history and student demographic snapshot of the student. There is also the 'Update Enrollment Records with Current' option which is typically used with incremental enrollment uploads to remove the older record.

## **Check Demographics**

For other types of demographic differences, there is a separate screen that will catch, flag, and display the issues to the user. The demographic check page will check records against our master SASID table and flag discrepancies to the user. The screen looks like the following (some information has been redacted for privacy):

> eRide Home > Enrollment Census (2009-10) > District Menu > Check Demographics

Log Out

Here, you will notice that the DOB in the first set has been flagged as inaccurate. The first record is the enrollment record, and the second is the SASID master record. The enrollment record states the DOB for this student to be xx/xx/1994 and the SASID master as xx/xx/1995. The second set of records shows that the first name is different in the enrollment record against the SASID master record. The last set of records shows that the last name of the student is different between submitted and master records. Districts are asked to review these errors and resolve them.

## **Weekly Notifications**

If there are any demographic and duplicate issues data issues to resolve, a district will receive an email every week with the number of demographic/duplicate issues that need work, and the date that they last updated their data. In addition, certain ONIS staff receive a similar email weekly delivered that summarizes all the outstanding data cleaning issues that districts need to work on. The report looks like this:

| Enrollment Census Weekly Status Report |           |          |            |               |           |         |                 |                    |            |           |             |            |                    |                    |
